

IoT Connectivity for Energy & Utilities

GLOBAL IOT FOR SMART ENERGY AND UTILITIES

IoT connectivity for Energy and Utilities

Telecom26 provides a global IoT platform for companies in the energy and utilities industries to implement next generation, smart solutions.

Monitor assets, gather data in real-time and reduce operational costs, safe in the knowledge that your data is travelling on a secure, global IoT network.

Deliver more intelligent renewable energy with Telecom26.

Operator
Member

Ideal for solar, wind and renewable monitoring

Reliable, rural connectivity with multiple in-country networks to ensure that your remote energy infrastructure can always be monitored

Pipelines, mining and employee welfare

Global coverage ensures that distributed teams are protected and valuable remote assets are secured end-to-end

Manage all your device connectivity with a single network provider

Telecom26's global coverage means you don't need arrangements with multiple networks - just ours! One network, one partner, one agreement

Helping innovators to transform the energy and utilities industries

With our global IoT network, you can be sure of the best available connection for your transformation projects.

Even the remotest assets are covered, our multi-partner global network means you don't have to worry about dead spots and data loss.

Telecom26, the perfect partner for your smart infrastructure.

Smart IoT for smarter energy

- Reliably monitor remote energy assets
- Optimise distribution to reduce costs
- Keep employees safely connected
- Build a smarter energy network
