

Innovations Programme

A sandbox to develop and create new solutions from Telecom26

In today's hyper connected world, constant, ubiquitous connectivity is a requirement for fostering innovation. Telecom26's Innovations Programme provides a sandbox to develop and create new solutions spanning all market verticals and unlocking new opportunities to realise the potential of ubiquitous connectivity.

What is the Innovations Programme?

- It's a **Sandbox** for the creation of new connectivity solutions
- Multi-million Franc investment in an innovations lab to test and **create business critical connectivity solutions** for all-Gs, Wi-Fi, LoRA and NB-IoT, in both private and public network scenarios
- Establishment of a creative, **collaborative environment** to exchange knowledge and bring ideas to fruition.
- Develop ideas and **test use cases** for new connectivity solutions
- Resource investment and representation from Telecom26's product development team to **encourage innovators to develop concepts** utilising Telecom26's connectivity ecosystem.

How it works

IDEA

You bring us a great idea

EXPLORATION

Together we explore it

BUILD AND TEST

Together we build it

LAUNCH

We take it to market

Why did we create it?

- Create an **environment for innovation**
- Generate **new solutions with third party vendors** (innovators) and bring them to market
- Create a constant **flow of new concepts** and ideas
- Facilitate real-time, **agile information exchange**
- Enable **rapid iteration**, test and trial
- Encourage and enable a holistic view for **solving complex connectivity problems**

What do we want to achieve?

- Work with industry leaders to **enable connectivity solutions** for the critical communications market
- Partner with vendors to **deliver public and private network solutions** from start-ups to established companies
- Develop new solutions for market prior to large commercial launch, creating a higher chance of market acceptance of the product
- Accelerate the delivery of **unique strategic connectivity solutions**
- Motivate, attract and harness resource talent and engage in diverse partnerships
